About Me

I'm a Self-taught MERN stack Developer and would like to work as a Frontend Developer . I have completed a real time project with both Client and Server side which is a Cricket Club's website including almost the Club's activities , players etc. and also have included an E-commerce section for sale the Cricket equipment , with node.js as backend and HBS (handlebars) as frontend. As React , I had participated in a major e-commerce Project with the frontend and which completed with the django as it's server side language. And have done a lot of mini projects also.

Education Background

GPTC (Government Polytechnic College , Perinthalmanna)

During 08/2017 – 06/2020

Diploma in Electronics Engineering

Projects

• CENTURY UNIVERSAL – CUCC

CENTURY UNIVERSAL is a cricket club's web application playing under Malappuram District Cricket Association (MDCA) , and which having two phases , user and Admin . Here User can buy the Cricket accessories and add their details if they are a Player of Century Universal . and apply coupons whenever they need. Admin can manage All users , shopping as well as the Products and add the Umpires and Officials of CUCC and, also add the upcoming Events and News as well at any time.

Key features –

- Bcrypt
- Cloudinary
- Multer
- Twilio
- Razorpay
- Sweetalert

Work Experience

- **React.js Developer**

10/2021 – Present

I am a self taught MERN stack developer and having been keen interest in the frontend .So I'd chosen the React , the modern and most using library of js , as the frontend language. I've done a lot of mini project using React js and a Participation of a main Project (full stack) as frontend , and also have done a project with MERN.

- **KIML (Kyungshin Industrial Motherson Ltd)**

04/2021 – 08/2021

Machine operator

Even though I started working as a Machine Operator, later I understood the fact that , that was not my real way and passion as well , so I just continued the coding wherever I quit . Eventually I could learn more about it and I chose to be in this field and make it as my career either.

- **e-cart**

e-cart is an e-commerce website using Reactjs as it's frontend and Python django as it's backend. Having two phases as Admin and User as well . Throughout the project Redux and Redux toolkit had been used for the better UI. As a frontend

Frontend

- Reactjs
- Redux
- Redux-toolkit

Backend

- Python django

Mini Projects

- **Todo App**
using Reactjs

- **Portfolio**
using Reactjs

- **Redux-projects**
Redux Projects
Redux toolkit
Redux Thunk
etc.

Declaration
