MarketMates is a social media as well as a Digital Marketing website using Reactjs as it's frontend and Python django as it's server side Language. Here the website includes almost every functionalities of a social media website such as Posts , Stories , Messaging etc with using some popular libraries and showing the current Digital Market status. Redux is used for the State Management.

Frontend
- React.js
- Redux

Backend
- Python django
- SQL

Work Experience

- ### *React.js Developer in Freelance*
  #### *from 10/2021 – Present*

As a self-taught MERN stack developer with 2.7 years of freelancing , I specialize the Frontend as React.js and Next.js for modern, dynamic web applications. I have completed full-scale projects in vanilla JavaScript and, as a Frontend Developer, crafted functional and visually appealing interfaces with React.js, Redux, and Next.js. I excel in building responsive user interfaces and effective state management. I have worked on numerous real-time projects, primarily using React.js, which has honed my ability to deliver high-quality, scalable solutions. My client-centric approach emphasizes clear communication and timely milestones, and I continuously upgrade my skills to align with the latest web and mobile application development trends, including React Native for developing mobile applications.

React.js Projects

- **hoteintl**
  cafe Web application (Private)

- **axeEdge Solution**
  Software firm's Web Page (Private)

- *freebills*
  Receipt generator app (private)
